MT130 PPLE QUIZ - 2

Q1. Analyze and explain the importance of Human Values in our life.

Human values are nothing but the thoughts and values of human beings. They play a vital role in the life cycle of a human being. Human values help us to grow and succeed in our life. Simply human values can be regarded as a decision-making quality of a person. Every decision is made in an organization or a company based on human values.

They help you to gain some motivation to manage your work and make progress in the right way. Human values help to tell our perception of the world around us. By learning human values you can know which is right and which is wrong.

Human values play a vital role in an individual, relationship, organization as well as in society. It includes honesty, love, peace, loyalty, etc. These are the qualities that are important for humans in all stages. Human values always reflect your thoughts. One must take all the possible efforts to maintain his or her human values.

Being a loyal person is also considered the best human value. Helping is also considered an important human value. Helping a person at the right time is very important. Possessing the clarity of what you want is your biggest value which helps you to build a strong foundation. If you follow all the human values then you will gain self-respect

Q2. Discuss the code of Ethics for Engineers and its implications for the Society.

Code of ethics for engineers

- Engineers shall hold paramount the safety, health, and welfare of the public.
- Engineers shall perform services only in the areas of their competence. Engineers shall undertake assignments only when qualified by education or experience in the specific technical fields involved
- Engineers shall issue public statements only in an objective and truthful manner. Engineers shall be objective and truthful in professional reports, statements, or testimony. They shall include all relevant and pertinent information in such reports, or testimony, which should bear the date indicating when it was current.
- Engineers shall act for each employer or client as faithful agents or trustees. Engineers shall disclose all known or potential conflicts of interest that could influence or appear to influence their judgment or the quality of their services.
- Engineers shall avoid deceptive acts. Engineers shall not falsify their qualifications or permit misrepresentation of their or their associates' qualifications.

We are entrusted with initiatives that affect the lives of hundreds of thousands of people as professional engineers. When it comes to professional engineering ethics, it is about much more than just avoiding criminal action. It is about protecting the lives we touch with our job from ineptitude and keeping them at the forefront of our minds as we work. Another major argument for having an ethical code for professional engineers is that it establishes a baseline for professional behavior. The public can also be confident that you are not deceiving them or working for personal advantage. The norm of professional behavior offers the people you work with and for a foundation of trust that you will act in the best interests of the project and the public.
